

Supplemental Information

SUPPLEMENTAL TABLE 4 MedDRA Preferred Terms Used to Identify Prespecified Conditions

| Prespecified Conditions | MedDRA Preferred Terms |
|-------------------------|--|
| Syncope | Syncope, syncope vasovagal, loss of consciousness |
| Anaphylaxis | Anaphylactic shock, anaphylactic reaction, anaphylactoid reaction, anaphylactoid shock |
| Autoimmune disorders | Autoimmune disorder, autoimmune hemolytic anemia, autoimmune thyroiditis, autoimmune thrombocytopenia, Behcet syndrome, colitis ulcerative, polymyositis, dermatomyositis, myasthenia gravis, polymyalgia rheumatica, Reiter syndrome, rheumatoid arthritis, scleroderma, sicca syndrome, Sjogren syndrome, systemic lupus erythematosus, systemic sclerosis, mixed connective tissue disease, Raynaud phenomenon, type 1 diabetes mellitus, Crohn disease, psoriatic arthropathy, juvenile idiopathic arthritis, Still disease adult onset, polyarteritis nodosa, antineutrophil cytoplasmic antibody negative, antineutrophil cytoplasmic antibody positive, ankylosing spondylitis |
| Venous thromboembolism | Thrombosis, deep vein thrombosis, mesenteric vein thrombosis, cerebral venous thrombosis, cavernous sinus thrombosis, intracranial venous sinus thrombosis, pulmonary embolism, embolism venous, axillary vein thrombosis, venous thrombosis |
| GBS | GBS, Miller Fisher syndrome, demyelinating polyneuropathy |
| Pancreatitis | Pancreatic abscess, pancreatic pseudocyst, pancreatic pseudocyst drainage, pancreatitis, pancreatitis acute, pancreatitis hemorrhagic, pancreatitis necrotizing, pancreatitis relapsing, cullen's sign, gray turner's sign, hemorrhagic necrotic pancreatitis, ischemic pancreatitis, oedematous pancreatitis, pancreatic hemorrhage, pancreatic necrosis, pancreatic phlegmon, pancreatorenal syndrome, blood amylase increased, lipase increased, pancreatic enzymes increased |
| Stroke | Basal ganglia infarction, basal ganglia stroke, basilar artery occlusion, basilar artery thrombosis, brainstem infarction, brainstem ischemia, brainstem stroke, carotid artery occlusion, carotid artery thrombosis, cerebellar artery occlusion, cerebellar embolism, cerebellar infarction, cerebellar ischemia, cerebral artery embolism, cerebral artery occlusion, cerebral artery thrombosis, cerebral infarction, cerebral ischemia, cerebral thrombosis, cerebrovascular accident, embolic cerebral infarction, embolic stroke, hemorrhagic cerebral infarction, hemorrhagic stroke, ischemic cerebral infarction, ischemic stroke, lacunar infarction, thalamic infarction, vertebral artery occlusion, brainstem embolism, brainstem thrombosis, carotid artery embolus, cerebellar artery thrombosis, cerebral infarction fetal, hemorrhagic transformation stroke, migrainous infarction, perinatal stroke, precerebral artery occlusion, precerebral artery thrombosis, thrombotic cerebral infarction, thrombotic stroke, vertebral artery thrombosis |
| POTS | POTS, dizziness postural, postural reflex impairment |
| CRPS | CRPS, mononeuropathy multiplex |
| ADEM | ADEM, encephalomyelitis, noninfective encephalomyelitis, acute hemorrhagic leukoencephalitis, autoimmune demyelinating disease |
| Transverse myelitis | Myelitis transverse, myelitis, noninfectious myelitis |
| POI | Premature menopause, ovarian disorder, amenorrhea |
| CIDP | CIDP |
| Death ^a | Died |

^a Also included reports in which the checkbox for "Patient died" was checked in Box 8 of the VAERS form.
